

Case Study

Commissioning

WMC Olympic Dam Operations, Olympic Dam, SA

RMDSTEM has provided a number of highly skilled personnel to WMC's Olympic Dam Operation to assist in the commissioning of a number of significant sections of the metallurgical plant, including:

1. The expanded smelting facility
2. Copper and Uranium SX
3. Uranium leaching and CCD
4. Pressure filtration

RMDSTEM has provided a range of people for these activities including highly competent professionals and semi-professionals.

Our people have unique commissioning skills and work seamlessly with the client's team in delivering the result. They are flexible with regard to work cycle and rosters.
